CONTENTS

Methodology for Assessing Health Risks from Complex Mixtures in Indoor Air

L. Fishbein and C. J. Henry. Introduction: Workshop on the Methodology for Assessing Health Risks from Complex Mixtures in Indoor Air 3

Sources and Management of Indoor Air Mixtures

L. A. Wallace. Comparison of risks from outdoor and indoor exposure to toxic chemicals 7

J. E. Woods. An engineering approach to controlling indoor air quality 15

P. Koutrakis, M. Brauer, S. L. K. Briggs, and B. P. Leaderer. Indoor exposures to fine aerosols and acid gases 23

R. Burrell. Microbiological agents as health risks in indoor air 29

Adverse Health Effects

M. D. Lebowitz. Populations at risk: addressing health effects due to complex mixtures with a focus on respiratory effects 35

R. Bascom. The upper respiratory tract: mucous membrane irritation 39

M. H. Karol. Allergic reactions to indoor air pollutants 45

J. E. Cone and D. Shusterman. Health effects of indoor odorants 53

J. S. Kroll-Smith and S. R. Couch. As if exposure to toxins were not enough: the social and cultural system as a secondary stressor 61

L. S. Welch. Severity of health effects associated with building-related illness 67

Methodological Evaluation of Health Effects

J. M. Samet and W. E. Lambert. Epidemiologic approaches for assessing health risks from complex mixtures in indoor air 71

M. D. Lebowitz. Methods to assess respiratory effects of complex mixtures 75

B. E. Lippy and R. W. Turner. Complex mixtures in industrial workspaces: lessons for indoor air quality evaluations 81

Biomarkers of Health Effects

R. F. Vogt, Jr. Use of laboratory tests for immune biomarkers in environmental health studies concerned with exposure to indoor air pollutants 85

K. I. Bolla. Neuropsychological assessment for detecting adverse effects of volatile organic compounds on the central nervous system 93

Case Studies

J. A. J. Stolwijk. Commentary. Sick-building syndrome 99

I. Broder, P. Corey, P. Brasher, M. Lipa, and P. Cole. Formaldehyde exposure and health status in households 101

R. E. Honicky and J. S. Osborne, III. Respiratory effects of wood heat: clinical observations and epidemiologic assessment 105

Development of a Risk Assessment Framework

C. R. Shoaf. Current assessment practices for noncancer end points 111

T. K. Pierson, R. G. Hetes, and D. F. Naugle. Risk characterization framework for noncancer end points 121

Future Directions

W. H. Farland. Future directions and research needs 131

Panel Overview

C. J. Henry, L. Fishbein, W. J. Meggs, N. Ashford, P. A. Schulte, H. Anderson, J. S. Osborne, and D. W. Sepkovic. Approaches for assessing health risks from complex mixtures in indoor air 135

Contributed Articles

M. N. Bates. Extremely low frequency electromagnetic fields and cancer: the epidemiological evidence 147

L. Magos. Epidemiological and experimental aspects of metal carcinogenesis: physicochemical properties, kinetics, and the active species 157

D. G. Penney and J. W. Howley. Is there a connection between carbon monoxide exposure and hypertension? 191

S. Parodi, D. Malacarne, P. Romano, and M. Taningher. Are genotoxic carcinogens more potent than nongenotoxic carcinogens? 199
